Aug 27, 2026

Gianfranco Mileo

has successfully completed the online Specialization

Generative AI for Program Managers

The certificate holder is proficient in leveraging generative AI to enhance a career in program management. They can explain the core concepts, capabilities, and applications of generative AI. They can craft effective prompts to generate accurate and valuable insights for program management. Specifically, they can use generative AI tools to enhance program execution, decision-making, and stakeholder engagement across various program management scenarios. They can leverage generative AI capabilities to analyze project data, automate reporting, optimize resource allocation, assess risks, & improve strategic planning throughout the program lifecycle. By completing the labs and projects, the certificate holder demonstrated their skills in using generative AI for Program Management

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
